

Transdisciplinary methods and tools for dealing with sustainability and land use conflicts

A one-week summer school on transdisciplinary (research) approaches for MA and Ph.D. students in Alt Empordà, Catalonia, Spain

Coordinators: Dr. Gemma Tejedor, Prof. Dr. Martina Schäfer/ Organizational support: Annabell Lamberth

Transdisciplinary approaches bring together the perspectives of science and society on complex real-world problems to co-generate transformational knowledge. The summer school aims to convey the basics of setting up a transdisciplinary project and introduce useful methods for inter- and transdisciplinary exchange. The methods are exemplarily applied to the land use conflicts in the Alt Empordà region (Catalonia).

Program includes:

- enable students to contribute with their perspective to problem formulation and research questions for complex problems
- facilitating mutual understanding of societal problems through better inter- and transdisciplinary exchange
- empowering students with tools and methods for collaborative work along the set-up of a transdisciplinary research project
- reflecting on whom to involve at which stage of the project, actor constellations as well as possible impacts of solutions developed
- sharing own experiences with transdisciplinary research and benefit from mutual exchange

General information about the course:

- **Course format:** Presential workshop
- **Date:** September 14th to September 20th 2024
- **Application deadline:** 30th of April
- **Acceptance feedback:** 15th of May
- **Early bird fee:** 325€ (due till 31th of May 2024)
- **General fee:** 375€ (due till 30th of June 2024)
- **Contact:** lamberth@ztg.tu-berlin.de
- **Application Link:** <https://forms.gle/cT5AhSg52Zvo4QgU7>
